SUMMARY

I'm a creative UI/UX designer keen at making user-friendly designs. I blend my skills in web and app design to create interfaces that look great and work well. I love learning new things and working with others to create designs and provide best experience. My goal is to make designs that are easy to use and help company in providing customer satisfaction.

WORK EXPERIENCE

System Administrator, Tata Consultancy Services

Nov 2021 - Feb 2024

- Manage the system, software, Hardware and network related issues and security portals and security agents at the system level.
- Collaborated with other companies for device-related issues and queries, including Dell,
- HP, Lenovo, Acer and Apple.

UI/UX PROJECTS

Language Learning Application With Case Study

March 2024 to June 2024

- As a UI/UX Designer, I spearheaded the development of a language learning application using **Figma** and **Illustrator**. I meticulously crafted **wireframes** and **high-fidelity prototypes** to map out the user journey and interface layout. My role involved creating custom illustrations and icons to enhance the application's visual appeal, while strategically employing **color schemes** and **typography** to improve readability and user engagement

E-Commerce Application

March 2024 to June 2024

- Designing the UI for an e-commerce application involves creating a **user-friendly** interface that enhances the shopping experience. Key elements include a homepage featuring attractive hero images, a clear navigation menu, and sections for featured **products**, **bestsellers**, and **new arrivals**. Product listings should offer grid or list views with **images**, **names**, **prices**, and **ratings**, along with **filters** and **sorting**, **Add to cart** and **Buy Now** options.
